

iNet.Live

Distribution Platform

Experience the cloud's most reliable video delivery

Our proprietary iNet Video Transport Protocol and distribution platform delivers for your audience.

- up to nine 9s of reliability with our iNet100 service
- dual channel delivery support
- ultra low latency
- multiple integrated error correction techniques
- capture, record, store and forward live transmissions
- "rough-cut" cloud editing for clip creation
- archive and share large (and small) video files
- searchable automatic transcription, subtitle creation and machine translation of audio track
- AI powered video analysis for brand and facial recognition
- built for you: unlimited usage, 24/7 service and an intuitive self-managed network.
